

Application No.: 10/643,164

Docket No.: 102323-0130

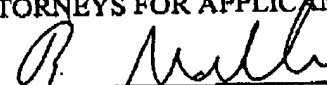

**REMARKS**

This is filed pursuant to the Examiner Interview conducted May 17, 2005. Present at the interview were Examiner Chat Do, inventor Jonathan Greene and Applicant's representative David Powsner. Agreement was reached as to removal of all pending grounds for rejection of the application. Claims 55 - 57 are cancelled without prejudice.

As discussed at Interview, the Declaration of the inventor, Jonathan E. Greene, is filed herewith. This establishes that the subject matter of the pending claims is supported in the U.S. Provisional Application No. 60/168,027 (the Provisional Application), filed November 30, 1999. As noted by Applicant at Interview and detailed in Applicant's prior filing, that publication also fails to teach or suggest the subject matter of the claimed invention.

In view thereof, and as agreed by the Examiner at Interview the rejection(s) over Jaber are withdrawn. As agreed at Interview, the Examiner will issue a Notice of Allowance or, if further search reveals prior art of interest, a further, non-final Office Action.

Dated: May 19, 2005

Respectfully Submitted,
